

# MIM 431E CONSTRUCTION PROJECT 2018-2019 FALL SEMESTER

ASST. PROF. DR. PINAR ÇAKMAK

## aim ...

- ✓ To identify *all stages of the construction project* together with the *schematic design* and *final design*; and to learn different *techniques* required by these stages.
- ✓ To perform the *design development* with the *integration* of *building subsystems* (building elements, structural systems, heating and ventilation systems, sanitary systems, mechanical and electrical systems) compatible with current *building materials* and *construction technologies*.

## topic ...

- ✓ The topic is a *single family detached house* in İstanbul

## success ...

- ✓ Students are expected to make **project submissions** (*schematic design, final design, and research report*) and participate in all research work, seminars, and studio works during the semester. Students are also expected to make a final submission of the **construction project** at the end of the semester.
